Wisconsin Commercial Data Exchange

CIE Solutions for Associations and markets custom fit for each individual market. Proactively researched properties, sales, and availabilities rolled in to a superior technology platform. We partner with brokerage firms, local associations, and economic development communities to create a customized, local database that serves as the most trusted source for information in your market. Join a family of markets that have chosen to work together to share information and break their dependence on high-priced, one-size-fits-all national services. Enjoy the best of both worlds – a service tailored to the needs of your market, with the benefits of exposure on our nationwide network.

Own & Control Your Data
You determine the rules for your platform and never give up ownership of your valuable data.

Local Control, National Exposure
Your members benefit from our network of partnering services around the country.

Powerful, Easy-to-Use Technology
Always evolving based on member suggestions, works great on all browsers and devices.

More Than Just a Listing Service
A networking, communication, and collaboration platform for your members.

Amazing Customer Service
Every employee in the company is committed to responsiveness. We're here for you.

We're a Partner, Not a Vendor
We use our 23 years of experience to grow your membership and drive your success.

Parcel Aerials

With a single click, generate a printable PDF for your client displaying relevant parcel boundaries overlaid on an aerial image of the property.

Retail Logos

With a single click, generate a printable PDF for your client displaying retail business logos overlaid on an aerial image of the target property.

Traffic Counts

With a single click, generate a printable PDF for your client displaying traffic counts for intersections near the target property.

Flood Maps

With a single click, generate a printable PDF for your client displaying a visualization of FEMA Flood Risk near a target property.

Environmental Risk

With a single click, generate a printable PDF for your client identifying nearby properties monitored by the EPA for inspection/compliance as reported by ECHO (Enforcement and Compliance History Online).

Demographics

With a single click, generate a printable PDF for your client including current and 5-year projections by either radius or drive time. Our algorithm calculates stats with proportionally weighted block-level accuracy — far more accurate than standard reports.

Google Earth Package

With a single click, generate a Google Earth site analysis bundle for your client including parcel boundary, basic information on the target property, 3/5/10 minute drive time rings, traffic counts, and nearby retail locations.

Retail Site Selector

Use our proprietary database of 400,000 retail locations to build a multi-layered study in Google Earth, analyzing potential locations for proximity (distance radius, drive time, or drive distance rings) to competitors.

Showcase Your Listings on Your Website

Plug in our search engine with a single line of code
or use our API to pull your listings in real-time

Looks Great on Phones & Tablets
