The Party Rages On.

With over 14 million square feet of absorption, and 10.5 million square feet of new buildings delivered, 2021 was the year of Industrial Real Estate in the M7 Region. The pace is only strengthening in the new year with robust tenant demand in the market, a healthy pipeline of supply on the way, and record low cap rates. How long can the industrial bull cycle continue its stampede?

Hear from our industry panel of experts as they discuss some of the following topics: Where are the new hot areas for development? Is there enough tenant demand for all the Spec coming online? Will construction costs moderate? Will Cap Rates go to 4%? Are the supply chain challenges of users and tenants abating?
